EDUCATION

Washington State University – Pullman, WA *Expected May 2027*

Bachelor of Science in Computer Science, Minor in Mathematics

Honors College | GPA: 3.88 | Junior

SKILLS

- Languages: C#, C++, Python, JavaScript, SQL
- Tools & Frameworks: Unity, WinForms, Git/GitHub, Visual Studio, Vim, NUnit, PostgreSQL

PROJECTS

Shroomwood - C# | Unity *Nov. 2024 – Aug. 2025*

- Contributed to a top-down action roguelike developed in C# using Unity as part of a 3-4 person team, resulting in a publicly released Steam demo.
- Owned development of gameplay-integrated UI systems, including an inventory UI with hover-based weapon stats and modifiers, a dynamic health bar, and proximity-based item descriptions.

PostScript Interpreter - C# *Apr. 2025*

- Implemented a C# REPL for a subset of PostScript in Unity, separating interpreter logic from the UI and supporting both dynamic and lexical scoping.
- Designed a modular operator system using delegates, with stack and dictionary management, structured parsing, and robust error handling to ensure correct program execution.

Event Booking Application - C# | WinForms | NUnit *Apr. 2025*

- Designed and implemented a C# WinForms event booking application with user accounts, searchable and sortable listings, booking workflows, and NUnit-tested core logic.
- Structured the codebase using OOP principles, generics, and polymorphism to support multiple bookable entity types and improve extensibility.

BrainBatch – JavaScript | Python | PostgreSQL | Supabase *Sept. – Dec. 2025*

- Built a full-stack group chat application in a team of three, implementing asynchronous API endpoints and PostgreSQL-backed data persistence using JavaScript, Python, and Supabase.

EXPERIENCE

Teaching Assistant | Advanced Data Structures in C++ *Aug. – Dec. 2025*

- Reviewed and graded C++ assignments, providing feedback on correctness, efficiency, and design.

ACTIVITIES & LEADERSHIP

Game Development Club President – WSU *Sept. 2024 – Present*

- Led semester-long software projects across 11 teams (25+ developers), defining project scope, milestones, and development phases.
- Organized a 48-hour game jam with 120 participants, delivering technical workshops and supporting completion of 39 projects.
